

Title of bachelor's thesis:

Case study of physiotherapy treatment of patient with Juvenile Idiopathic Arthritis

Summary:

I focus on rheumatic diseases in childhood in my thesis, especially the issue of juvenile idiopathic arthritis. This work contains three parts; the first consists of the condition, the second is theoretical, focusing on a more detailed description of the diseases, including screening and subsequent therapy and the third is a special part that contains a case study of physiotherapy treatment of patient with juvenile rheumatoid arthritis. I worked on this case study during my month experience in the Rheumatology Institute in Prague. The special part consists of the input and output kinesiological analysis, the short- and long- term physiotherapy plan, therapy suggestions and description of ten exercise units.

Key words: rheumatology, juvenile idiopathic arthritis, therapy, case study
